Fager, Edward William 1917-1976

Edward William Fager Field Notes, 1956-1976

Physical Description: 2.5 mss

Arrangement of Collection: Subject files arranged alphabetically

The collection consists of the field notes of marine biologist Edward W. Fager generated from 1956-1989 while he was Professor of Marine Ecology at the Scripps Institution of Oceanography, UCSD. The collection contains a set of four volumes of field notes by Fager dated February 11, 1956-August 16, 1974 which give an overview of his field activity. The volumes record observations of tides and marine life, detailed descriptions of specimens collected on field trips on land and diving expeditions, including Dike Rock off Scripps beach north of the pier. The collection includes folders of data compiled from field trips during Fager's Marine Ecology 225 class at Scripps Institution of Oceanography. The collection includes information on scuba diving field trips including log sheets and regulator information. There is one folder containing undated photographs of graduate students at the Scripps Institution of Oceanography.
