SCRIPPS INSTITUTION OF OCEANOGRAPHY ARCHIVES

Reid, Joseph Lee, Jr. 1923-

Joseph Lee Reid Papers, 1955-1977

Physical Description: 3 mss; films

Description: The accession consists of subject files generated or collected by Professor Joseph L. Reid. The material consists largely of correspondence, reports and other documents concerning NORPAC, an international synoptic oceanographic survey of the North Pacific Ocean undertaken in 1955 including participating agencies from Japan, Canada and the United States. Reid served as secretary for NORPAC. The collection includes some material documenting Equapac, a 1956-1966 international oceanographic expedition in the waters of the South Pacific. The accession includes three films of expeditions. Two of these are identified as original films taken on Boreas, which was a leg of Scripps Institution of Oceanography Zetes Expedition, January to August 1966.
